Objective: To find a position in the Fire Protection Industry, in Engineering, Estimating, Sales, or Project Management.

I have the ability to manage multiple tasks individually or in a team environment. I execute instructions and requests to carry out efficiently in line with relevant polices and processes.

I have worked with both Sprinkcad and Hydrotech Fire Protection Autocad programs from 1995 to 2006. I used the Hass & Walsh Calculation programs to perform Hydraulic Calculations.

My design experience ranges from NFPA 13, 13D, 13R, 14, & 20. I have some background in Special Hazards including pre-action systems and clean agent.

The types of projects I am most familiar with hospitals, schools, retail, residential, office, and industrial buildings.

I coordinate my sprinkler layouts in the field or from remote office locations with the other Mechanical Trades.

I interact with Architects to provide layouts that conform to their above ceiling requirements.

I have extensive fire protection material knowledge and costs. I can provide installation budgets for pre-construction estimates.

My professional work history: the last 10 years

Consulting from: 5-4 to present

Rustic Fire Protection - Norton, MA.
