Virtual Tour of the Liberty Mutual Fire Lab

Liberty Mutual Insurance has designed, built, and equipped one of the industry's most advanced fire labs. For the past thirty years, the fire lab has been an invaluable tool for educating customers on best practices in loss control. The fire lab is also used for training Liberty Mutual Insurance employees on loss control topics that directly relate to their role. The Liberty Mutual fire lab is one of only a few in the world to feature live fire demonstrations along with a multitude of water-based fire protection equipment, various industrial hazards, and other fire protection features, including: wet, dry, pre-action, and deluge sprinkler systems, fire pumps, flammable liquids demonstrations, low-expansion foam systems, special suppression systems, dust collection and spark detection system and much more!

The virtual tour will be presented by David R. Hague, P.E., CFPS, CET. Dave is the manager of the Engineering Technical Unit at Liberty Mutual Insurance in Weston, Massachusetts where he is responsible for the Liberty Mutual Engineering Manual, training programs for internal and external customers, coordination of plan reviews and, coordination of Liberty Mutual's involvement in NFPA Technical Committees. Dave also manages the operation of the Liberty Mutual Fire Lab in Wausau, Wisconsin. Dave is a member of the NFPA Technical Committees on Commissioning, Standpipe Systems, Water Spray Systems, Fire Pumps, Combustible Liquids and Protection of Records. Prior to joining Liberty Mutual, Dave served as a principal engineer at the National Fire Protection Association where he was responsible for NFPA standards on suppression systems and has written several books and developed several seminars on the subject of fire protection systems.
