COST: \$40.00 at the door
MENU: Beef \$35.00
Chicken \$30.00
Pasta \$28.00

VIDEO FLAME AND SMOKE DETECTION

The use of video for smoke, flame and intrusion detection has become state of the state of the art for unusual applications. This camera-based detection system visually detects the presence of smoke or fire at its source independent of any airflow in the area. These systems provide a critical advantage for early warning fire detection identifying and reacting to fire situations in their earliest stages to help protect property and save lives. They are well suited for applications where traditional smoke detection technologies may not be practical or efficient. Current applications include fossil fuel power plants, nuclear facilities, industrial facilities, cultural properties, warehouses and tunnels.

Our presenter is Bryan Mango, General Manager of Mammoth Fire Alarms. Bryan has been involved in the fire protection industry for thirty five years and has been employed by Mammoth Fire Alarms serving the New England life safety market since 1991.

Please reserve by Wednesday, May 4, 2011. Make checks payable to NEAFPSD and mail to NEAFPSD, P.O. Box 149, Wrentham, MA 02093-0149 for reservations. Send all e-mail dinner reservations to: rsvp_neafpsd@yahoo.com

10th BIENNIAL NEW ENGLAND FIRE PROTECTION PRODUCT SHOW

Hope you enjoyed the Product Show. If you have any questions, comments, would like to see a particular vendor invited to attend or would like to get involved in producing the Show please let anyone on the Board of Director know.
