

Paul J. Theriault, P.E.

It is with great sadness that we inform you of the unexpected loss of our friend and colleague *Paul Theriault* on October 7, 2005 in the Florida Keys.

Paul was one of the original founders of the New England Association of Fire Protection System Designers in 1990. He has served as a member of the executive board since that time and held the position of president for several of those years. He was a Fire Protection Engineer with over 20 years in the business. He was well respected in the fire protection and code consulting industry and will be a great loss to the profession. During his career, his activities involved all phases of engineering and design aspects of fire protection, detection and life safety systems for commercial, industrial and residential fire protection projects from inception and concept through design, installation, and inspection. Paul was a registered Professional Engineer in Fire Protection and Certified Fire Protection Specialist (NFPA). He was a Licensed Sprinkler Contractor and held NICET certification in Automatic Sprinkler and Special Hazards Systems Layout. Since 1988, he has been an active faculty member and fire protection lecturer at Northeastern University. Paul was instrumental in the development, as well as lecturer of numerous evening fire protection and design courses, guest speaker presentations and day seminars. He was an active member in numerous industry related associations and societies serving on various executive committees and task groups. In addition to being nationally known through his involvement with several professional associations, Paul always found the time to be a friend, leader and mentor to many. He will be sorely missed.

Paul leaves his beloved wife Denise, son John and daughter Jennifer.
A fund has been established to assist his family,
“The Paul Theriault Family Memorial Fund”
in his memory and honor.
