

## **The new UL Listed Antifreeze that Johnson Controls (Tyco) named Liquid Freeze Protection (LFP™) and a review of the new DV-5A Deluge and Preaction valve.**

### THE PRESENTATION:

The first half of the presentation will review the new UL Listed Antifreeze that Johnson Controls (Tyco) has recently released named Liquid Freeze Protection (LFP™). LFP™ is listed to -10°F, 150°F and is listed for NFPA 13, 13R and 13D fire sprinkler systems. LFP™ is the only UL listed antifreeze on the market for fire sprinkler systems. The second half of the presentation will review the new DV-5A Deluge and Preaction valve that Johnson Controls (Tyco) released last month. The new DV-5A valve assembly will replace the previous DV-5 valve assembly and is UL, ULC and FM approved. The new DV-5A valve has a higher-pressure rating (300 psi), a lower pressure drop, a smaller footprint, is built with a modular trim concept, has one moving part and has an external reset.

THE SPEAKER: Seth Wood - Johnson Controls Northeast Business Development Manager – Fire Suppression Products

Seth Wood has been working for Johnson Controls for nearly 3 years and prior to joining Johnson Controls he worked as a fire protection consulting engineer in Boston, MA for 12 years. Seth has experience working on different types of buildings that are located throughout the world. As a Business Development Manager, Seth works directly with Engineers, Architects, Owners, AHJ's and Contractors to assist them with technical questions, design assistance, specification reviews and presentations on different fire suppression brands that Johnson Controls offers, such as Tyco, Ansul, Chemguard, AquaMist and Pyro-Chem.
